

Setting up Hub Pages for Your Affiliate Marketing

A Hub page is similar to a web page, where you publish content for others to read. You can use Hubs to establish yourself as an authority on a particular topic. Use them to build incoming links and drive traffic to your affiliate product sites as well as your own website. Hubs can also assist in search engine ranking as pages are indexed quickly.

You can use hub pages in a variety of ways including:

- Offer tips on using PLR
- Create product reviews
- Help solve problems like where to find mom targeted PLR
- Offer information & ideas for marketing to moms, generating passive income, etc
- Add articles and offer recommendations using your affiliate links

The longer your pages are the better. You receive a higher page score for original content and length.

Make Money On HubPages With Google AdSense

We can sign you up for a new Google AdSense account with the information you've already given us, or we can link your existing AdSense account to HubPages.

This allows us to display ads on your behalf. It's easy, and it's important. AdSense is one of the main ways people make money on HubPages.

It's easy to do, because we do it all for you. We'll write the code that links their ads to your articles. All you have to do is create great content.
